EXPERIENCE

Junior Research Fellow (Software Development)

June 2026 - Present

Engagetel Solutions

- Built **three internal modules** for a full-stack platform, cutting post-review bug count by **25%** through mentor-guided walkthroughs.
- Delivered **five features** spanning frontend and backend layers, shortening average sprint turnaround by **18%** via focused peer critique.
- Automated** two recurring setup tasks using AI-assisted scripts, saving close to six hours of routine work weekly.
- Refined component structure** across four planning sessions with senior engineers, lowering rework on a shared library by **20%**.

Software Engineer Intern

December 2025 - June 2026

CareFi (Aldun App)

- Engineered and launched** a multi-module **Geotagging** feature with real-time location capture and tagging, **achieving 95%+ tagging accuracy and a 30% reduction** in manual input effort for users.
- Optimized** payment flow by refining **PayU SDK** integration, eliminating redundant payment mode selection and improving checkout experience, contributing to a **15–20% reduction in user drop-offs**.
- Streamlined behavioral analytics** using **PostHog** across five user flows, surfacing three drop-off points that informed a **12%** increase in onboarding completion.

Full Stack Intern

May 2025 - July 2025

CodexVeer

- Assembled **15 reusable Flutter components** adopted across eight app screens, cutting duplicate UI code by **30%**.
- Engineered **scalable RESTful APIs** with Node.js and MongoDB, processing **1000+ concurrent requests** under 200ms latency.
- Reorganized query structures, achieving a **40% boost** in database transaction efficiency during peak operations.

EDUCATION

Bachelor of Technology -[CSE]

Indian Institute of Information Technology, Vadodara

December 2022 - May 2026

TECHNICAL SKILLS

Languages	C, C++ , Python, Dart, HTML, CSS, JavaScript, R, MATLAB
Frameworks	Flutter, Flask, React.JS, Node.JS, Express.JS
Technologies/Database	Linux, Git/GitHub, Firebase, MongoDB, SQL
Developer Tools	Android Studio, VS Code, Postman, Apache JMeter, Visual Studio, PyCharm, Figma, XCode
Core Areas	Data Structures & Algorithms, OOP, Low-level & High-level design, Agile/Scrum, Flutter UI & animations, API Development

PROJECTS

Geotagging Feature (Aldun App) | Flutter, APIs, Location Services

- Architected** a real-time geotagging system enabling location-based data capture using device GPS and APIs.
- Achieved **95%+ location accuracy** while reducing manual input effort by **30%** through automated tagging workflows.
- Devised** fallback mechanisms for location failures (permissions denied, low accuracy), ensuring consistent tagging flow.

BuildBuddy | Python, LangGraph, FastAPI, LLMs

[GitHub](#)

- Modeled a four-agent coding assistant** that converts written requirements into architecture, implementation, and test plans, trimming initial scaffolding time by **30%**.
- Resolved output conflicts across 20 generated files** by steering four autonomous agents through repeated review cycles, shrinking manual fixes by **35%**.
- Translated project specifications** into working code with **LangGraph** and **five development utilities**, holding build consistency above **90%** across multi-file projects.

POSITION OF RESPONSIBILITY

Secretary, Eloquence Drama Club

June 2024 - April 2025

- Directed planning and execution of **6+ stage events**, driving member participation up by **40%**.
- Coordinated four promotional campaigns** and delegated tasks among six members, lifting event attendance by **25%**.
